CANDUSKY COMPANY for MANU-

ANDUSKY COMPANY for MANUFACTURING CEMENT.—The subscribers have organized a Company, under the title of THE SANDUSKY CITY MANUFACTURING COMPANY, as chartered by an especial sot of the State of Ohio, of the 16th June, 1851, which limits the stockholders' responsibility to the amount of their subscriptions, except in case of laborers' wages. The object of the Company is to carry on the business of quarrying, manufacturing and selling Bydraulic Cement at Sandusky City and Ottawa, in Ohio; and they propose making up the full amount of the capital required for this business, by getting additional subscriptions in New-York.

The Company have secured eighty-four acres of land, comprising a portion of the township of Ottawa, which occupies the extremity of the long pennsula stretching into Lake Erie, on the north and west idea of Sandusky Bay.

A vaisuble bed of the very best quality of Cement extends under nearly all this lot of eighty-four acres—cropping out everywhere ary-mot the boundary of this part of the peninsula, a few feet above the water's edge. The layer has been worked for a thickness of ten to twenty feet, and the largest vessels navigating Lake Erie can lie close up to the Ottawa Dock, so as to be loaded from the quarried investiy. No other quarries of Hydraulic Cement are known to exist any where in that region of country. The demand for the article for cisterns, railroad culvers, cellars, and the walls of buildings, is immense, and daily increasing. Responsible parties have offered to quarry from this property, burn end grind the Cement, and deliver it in barrels, on the wharf, for 75 cents per barrel: the actual cost will not exceed 65 cents, it is strictly a cash article, and sells at Sandusky by the cargo for nearly, or quite, double that price, and the demand cannot be supplied by several such works as this Company now propose creeting. The capital required is as follows: For the absume-engine, milk &c., capable of putting up 300 barrels of Cement daily. A subscribed, and the the remain.

500 TUNS of WIRE WANTED .-TUNS of WIRE WANTED.—

Propesals are invited by the undersigned, on the part of the NIAGARA FALLS INTERNATIONAL BRIDGE COMPANIES, for the construction of the wire cables of the Railroad Suspension Bridge, of 800 feet span, to be erected over the Niagara River, below the Falls, for the delivery of ONE MILLION OF POUNDS OF IRON WIRE, or any portion of it, not less than 100,000 lbs., at the site of the bridge, on the following conditions:

1. The wire is to be of No. 10 size, so that 20 feet will weigh exactly one pound.

2. The skeins to weigh no less than 18 lbs. An offer for 50 to 49 lbs will be greatly preferred.

3. The wire must be finished with a lime cost, smooth and even, both ends of the same thickness.

4. It must be finished in three holes, or nearly as bard as spring wire.

4. It must be inished in three holes, or nearly as hard as pring, wire.
5. The iron must have been manufactured of the best quality of charcoal blooms, which will make hard wire of great elasticity, strength, fibre and toughness.
6. The blooms must have been manufactured of coid-blast charcoal pig, and not of anthracite pig, nor of hot-blast pig.
7. Satisfactory evidence will be required beforehand of the quality of the iron, of which the wire is to be drawn.
6. The wire must be drawn on blocks of no less than two feet in diameter.

E. The wire must be drawn on blocks of no less than two feet in diameter.

9. It must be put up in bundles of 200 bs., as near as can be done, without small skeins.

10. The wire is to be delivered in five equal portions during the months of May, June, July, August, and September of next year.

11. On delivery the wire will be examined and tested in the following manner: Of every 5 bundles, or 1,000 bs., one aksis will be greated, and suspended between two posts 400 feet apart, the one end attached to a capstan, by which it will be gradually hauled on until it breaks. The condition now is, that this wire must not break with a greater deflection than 9 inches, which is equivalent to 1,500 lbs., or 90,000 per superficial inch of solid wire section. If it stands this test, then further examination of that 1,000 lbs., in respect to other qualities, will be contractor.

12. As regards toughness and fibre, each end of a skein will be rejected and placed at the disposal of the contractor.

12. As regards toughness and fibre, each end of a skein will be rested by bunding it square over the jaws of a large pair of new and sharp pliers, and bending it back again. The wire must stand this test without the less; sign of failure. Its hardness and elasticity will at the same time be examined by bending and awinging, also by harmoring, filing and notching the ends, which forms part of the operation of splicing. notching the ends, which forms part of the operation of
